

# What Makes Kool Tack Better?

*Now! 100% completely reversible*

## Why use Kool Tack?

- 1. Drymount in 15 to 20 seconds.** 6 times faster than other drymount foam board.
- 2. Drymount at a lower temperature.** Makes it safe for most types of inks, and photographs. The lower temperature also extends the life of the press, while lowering operating costs.
- 3. Kool Tack foam board had more foam per square foot.** Makes it smoother, and more resistant to dents, and the “orange peel” effect.
- 4. Kool Tack can be used over, and over again.** Substantially reducing scrap, and costs.
- 5. Kool Tack is non “Tacky”.** The adhesive eliminates the dirt, and dust sticking to the surface.
- 6. Kool Tack has a smoother adhesive surface,** which produces a smoother drymount.
- 7. Kool Tack adhesive is ph neutral,** and has passed all industry lab tests.
- 8. ATG tape, adheres to the Kool Tack adhesive surface.** Also can be marked on using a pencil, or pen.
- 9. Every sheet of Kool tack in 100% inspected** before being packed.
- 10. Millions of sheets have been produced** without a single manufacturing defect.
